Education

- **Southwest University** Chongqing, China
  Bachelor of Science in Computer Science; GPA: 3.9/4.0 *Sep. 2020 – June. 2024*
  - Coursework:Mathmatical Analysis, Linear Algebra, Probability and Statistics, Operating System Theory, C++ Programming, Design and Analysis of Algorithms, Computer Networks, Data Structure, Discrete Mathematics, Computer Vision, Machine Learning, Data Mining.

Experience

- **Dartmouth College, Department of Computer Science** Hanover, USA
  Research Intern, advised by Professor Yujun Yan *June 2023 - Jan 2024*
  - Working on developing principles for graph-based ML models that are both expressive and generalisable

- **iOPEN Laboratory, Northwestern Polytechnical University** Xi'an, China
  Research Assistant, advised by Professor Chao Gao *Mar 2021 - Feb 2023*
  - Studied the sparseness problem in recommendation system and proposed a two-staged GFNCF model to help solve the problem. Conducted extensive experiments on five publicly available real-world datasets to verify the effectiveness of the model.
  - Used graph spatial-temporal self-attention network with contrastive regularization for passenger flow prediction.
  - Developed a novel optimized dynamic deep graph infomax method for dynamic community detection.

- **Data Science and Network Intelligence Laboratory, Southwest University** Chongqing, China
  Research Assistant, advised by Professor Li Tao, Chao Gao *Nov 2020 - present*
  - Explored multi-agent deep reinforcement learning techniques. Developd a reinforcedment learning method to identify influential nodes in large-scale real networks while combining the strengths of both temporal heterogeneity and distributed local policy selection.
  - Proposed a new measure and summarized three main temporal features for node pairs in temporal networks and integrate them using weighted arithmetic mean.
  - Verified the effectiveness of the proposed temporal neighborhood change centrality and conducted experiments on various temporal networks.

Skills list

- **Languages**: English (IELTS:7.0/9.0, TOEFL 96/120), Chinese (native language)
- **Programming**: C/C++, C#, Python, Pytorch, TensorFlow, LATEX, Markdown

Others

- **Awards**: Academic Science Award(1%), Merit Student of University (5%), Second-tier Scholarship (10%)
